

## **The Vodacom Business Showcase features the Vodacom English Electric Lightnings.**

For the first time at a major aviation event in South Africa, Vodacom Business has partnered with Thunder City to showcase the Vodacom Lightnings.

Vodacom Business is positioned to provide LEADING Communications and Next Generation NETWORK SOLUTIONS for A CHANGING WORLD.

Like the English Electric Lightning known for its vertical climb performance and ability to break the sounds barrier, Vodacom Business is changing the way business does business through its fixed and wireless access technologies which includes 3G and HSDPA, WiMax, Microwave, ADSL, Leased Lines and Fibre.

The 2xLightning formation will be lead by Mike Beachy Head, and accompanied by Dave Stock.

Vodacom Business can Break the Sound Barrier of your business with its 4 Main Towers Services. These include,

### **1. Access Services**

A state-of-the-art, carrier-class, next-generation network that offers both fixed and wireless access technologies ranging from 3G and HSDPA, WiMax, Microwave, ADSL, Leased Lines and Fibre.

### **2. Managed Hosted Services**

Providing customers the ability to outsource functions such as hosting, application services, storage and security functions which will be housed in our specialised, robust and fully redundant data centre

### **3. Managed Network Services**

These include a range of Internet service provider solutions, virtual private network (VPN) solutions and a next-generation network that will provide communication options including traditional mobile voice and Internet based voice solutions.

### **4. Converged Application Services**

Enabling customers to access any communication service or application via a range of devices, from anywhere offering true convergence.
